

SQL Change Guard

Licensing and Deployment

Licensing Model and Quick Installation

On-premise | 30-Minute Setup

1. Licensing Model

SQL Change Guard is offered on-premise with an annual license model. Pricing is tailored by server count, user count and required modules. Dedicated packages exist for banking, finance and public sector.

- Scalable by server count
- Annual license and maintenance options
- Banking and Finance, Public Sector, Enterprise packages
- The license is validated by the system using customer, package and expiry information

2. Installation Target

The system is designed to be stood up in an enterprise environment within 30 minutes. No hardcoded values are used; configuration is managed via appsettings; environment dependencies are minimal.

3. Installation Steps (Summary)

- 1. Prepare the application SQL Server database (2016 or later)
- 2. Copy the API and Worker files; enter the connection and settings in appsettings
- 3. On first run, the schema is applied automatically via numbered, checksum-protected migration scripts
- 4. The immutable audit database is prepared automatically
- 5. Enter the license key; define users/roles and servers
- 6. Configure LDAP/AD and SMTP integrations (optional)

4. Prerequisites

Component	Requirement
Application database	SQL Server 2016 or later
Server	Windows Server, .NET 10
Network	Internal; no internet required
Client	Modern web browser

5. Maintenance and Upgrades

Updates arrive as new numbered migration scripts; applied scripts are checksum-protected and never edited. Version upgrade is performed by replacing application files and letting the schema update automatically.

6. Free Demo

You can request a 20-30 minute live demo on your own environment. Contact us for a quote tailored to your organization.
